Trounday, round 20	
Thursday, 5 June 20	25
Friday, 6 June 20	25 pcoming: I'll have some time. I want to refine my model and define a clear benchmark.
Saturday, 7 June 20	Upcoming: some better graphs. Outside of training range graph.  25 nalysing of data.
	Upcoming: WEEKEND: Lit. Review final refinement. Arbeitsprotokoll redo in outlook or something. Fun: analysis of deviation of longer expressions in range.
	Upcoming: I'm prolly gonna get a response tomorrow regarding the lit. study 2thingy, so correcting that should be neat. On Tuesday, my dad will give me the grammarly grammar corrections. Additionally on the weekend I want to: look at 0.5 padding and maybe start analyzing different architectures (as in 25eurons and layers) of the model.
	Didn't get a response yet lol. I'm not sure if it's gonna be enough to finish training other models with different architectures. I forgot to do it today, but you should try different floats for the padding tommorow.
Tuesday, 10 June 20	point. I would like to finish up the examination of different models and
vicanosaay, 11 June 20	250 bmiting this notebook. I NEED TO ASK J.SMITH WHICH FORMAT SHE PREFERS  For tomorrow I need to finish up correcting the literature study, as well as
Thursday, 12 June 20	reach an end in the FNN notebook.
Friday, 13 June 20	No more stress for now. Coming up next is a presentation. I should get to working on that as soon as possible (bcs of exams). Depending on what I'll be 25 bmitting (with or without code) I might have to code a little further: I
